

Mastedly is Crystal Delta's comprehensive portfolio of industry leading education products and services. We innovate in technology that enhances learning and teaching.

## Course Authoring. Loree.

Accessible and interactive. With zero-code, author responsive and standardised course material from within the Learning Management System editor to promote adoption and engagement.

### INTUITIVE

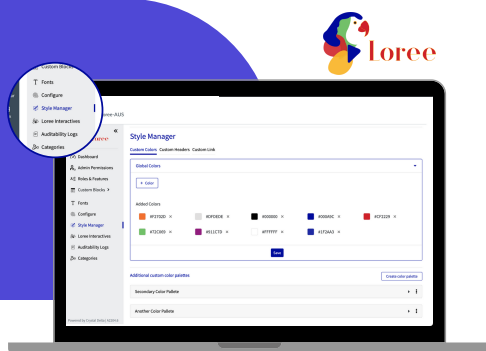

Accelerate course authoring with ready-made blocks and customisable templates. Create fully responsive and consistent course pages within your LMS. No coding required.

### ACCESSIBLE

Achieve equity in access for diverse learners, and create accessible, well designed content using Loree's built-in WCAG 2.1 AA Checker. No coding required.

### INTERACTIVE

Inspire learners with easy-to-add interactive elements. Increase learner engagement while reducing the time it takes to create. No coding required.

## Interactive. Efficient. Course Authoring.

Loree supports institutions with scaling learning design across your entire organisation.

### Design & Share

Improve the quality and consistency of your course content whilst empowering your educators with easy-to-use and easy-to-share course templates.

### Admin Dashboard

Assign global design rules and practices. Manage roles, features, categories, and interactive elements within the admin dashboard.

### Style Manager

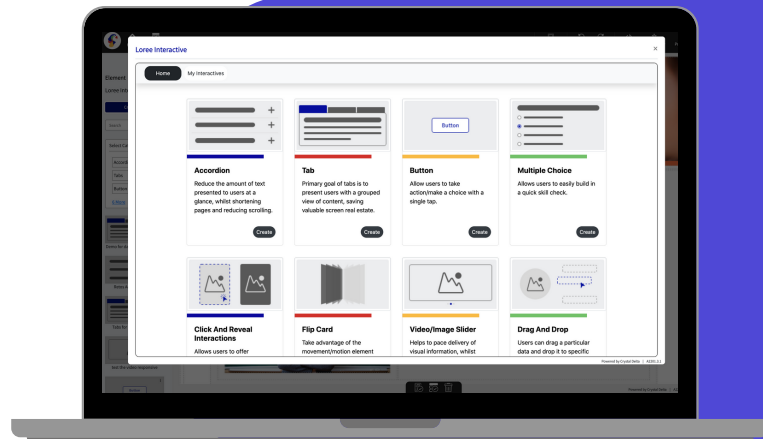

Establish and share global styles to maximise course consistency. Upload a custom font, set brand colors and customise subaccounts to meet your organisational needs.

## Engaging. Interactive. Course Design.

Create engaging learning experiences by easily adding interactive elements. It's as easy as 1, 2, 3!

### Accordion

Reduce the amount of text presented to users at a glance, whilst shortening pages and reducing scrolling.

### Tab

Primary goal of tabs is to present users with a grouped and layered view of content, saving valuable screen real estate.

### Buttons

Allow for easy and intuitive actions for learners to take or make a choice with a single tap.

### Multiple Choice

Allows users to easily build in a quick skill check. Optionally, data can be collected for learning analysis.

### Flip Cards

Take advantage of the movement/motion element within this interactive to increase learner engagement.

### Image/Video Slider

Helps to pace delivery of visual information, whilst reducing scrolling.

### Click and Reveal

Allows users to offer additional information upon interaction. Great for a quick skill check.

### Image Hotspot

Allows learners to tap a specific area of an image increasing engagement.

### Drag and Drop

Allows learners to interact with an image by matching text elements to a specific area/s.
