

Custom LTI Development

The Crystal Delta development methodology can build almost any kind of Learning Technology Integration (LTI) a customer would require. We excel at integration for systems that do not support the LTI standard. EdTech Smarter.

Extend Your LMS to Additional Platforms

Education institutions rely on a number of systems for administrative and education purposes. There are extensive benefits to integrating your systems and streamlining operations to improve learning outcomes.

Student Information Systems

SIS for managing student information and enrolment

Enterprise Resource Planning

ERP systems are used to manage the financial aspects

Customer Relationship Management

CRM systems are used for other sales related data regarding students

Web Portal

A common way to link your LMS to external users such as parents.

Crystal Delta delivers LTI features efficiently and is able to progressively shape this to suit customer feedback. LTIs can be developed in merely weeks, and are ready to use thanks to ongoing testing and validation.

Cloud

Cloud systems allow for deployment, scaling, and cost flexibility

DevOps

Advanced automated delivery based on operational requirements

Test Driven

Features get tested during development and ready earlier

Security

All aspects of user access and data are considered from the start

Crystal Delta belongs to a new breed of companies that are set on proving that small companies can do big things. Our daily driving purpose is delivering pragmatic technology solutions in Education. Learn more at www.mastedly.com
